MUSIC AS MEDICINE.

Decatur Wailn

The doctors of melody and the doc tors of medicine of New York are try ing some interesting experiments of music as medicine for the mind diseased An approved piano was taken to the asylum on Bluckwell's Island and Pat tison, the pinnist, went to play on the instrument, and some accompanying doctors to observe and note the results Some of the effects were novel and in teresting, if not surprising. The subjeets were brought one at a time under the influence of the tone power of the unsucal battery. The first was a young Irish woman afflicted with acute manua She had a straight jacket on when brought in, and looked intractable and vicious Pattison played. During the performance (a heroic sonata by Beethoven) the woman became very do cile and the jacket was removed. She gave many facial indications of interest No 2 was an Irish girl-tacitum and stolid, with a stealthy, cat-like expression. She carled herself up in hershawl and wouldn't talk Under the influence of maste her rigid facial muscles relaxed and she lost control of them, and her hawl fell limp thout her. The transi tions of music from grave to gay were responded to by contractions of her brow - which indicated a mental strug gle against the influence of gayety Then a smile relaxed her mouth, and her evelids fell her rigidity was gone and she was calm. These effects were pronounced by the doctors purely eno ากแล

No 3 was a case of hysterical melan holia Fundy affliction had unsettled her reason. She went continually like Niobe, all tems. She was a wo man of some cultivation, and was es termed a good mental instrument to play on Pathetic music was found to kepen her melancholy and mercase the flow of tears, while lively scherzo measuses dued them up, and she became apparently cheerful and happy. The sunshine of a smale even came over her ed, tearworn face and lighted he

-wollen eyes -No 1 was one of violent recurrent uama She was a woman of 35, and exited as a hopeless case of dementio Her expression was vacant, stony, dead Music had no effect whatever on her ace of manner, but it was observed that music iffected the circulation of her Her pulse was accelerated twelve bruts a minute by the application of thythm. This curious experiment was repeated three times with the same results to the arteries, while, the mus les were not moved

Three other similar subjects were perated upon in the same manner. The pulse responded to the different meas nes and forms of music Without any other indications of emotional impres son the heart heats would rise from 80 to 100 and show changes in force and trength. These experiments showed to the satisfaction of the doctors that music served hold of the nervous sys tem and to some extent swayed it whether or not it reached the mental cat of the malady

The pianist experimented on musine different keys and made a professional study of his own. He discovered that Home, Sweet Home, 'played in F sharp was more effective on this class of test subjects than any other key. This seemed to open a new field of musical investigation, and the musician and doc tors resolved to pursue their studies Iron and Lead Pipes; also further Through the emotional power of music these distorted minds may be charmed buck into the realm of reason and these blank natures may furnish the page whereon to write the notes of new musical theories. TOE Hon. E. J. Morris, of Phyladel phia, late American Minister at Constantinople, says, in an interview, that England opposed the first trenty of commerce between the United States and Turkey, and opposed the concession of trading in the Black Sea. He declares the commerce of the world is indebted to Russia for the opening of the Black Sea, and expresses the opinion that Eug. land is more interested in closing the Dardanelles to ships of war than Turkey, the Porte knowing that Constantinople is really safer with the fleets of all the world riding before its walls than u is when they are excluded.

TAR Railroad Gazette reports the number of railroad accidents in this country during 1877 at 891, in which 214 persons were killed and 1,037 were United States, in silver dollars of the injured. This is the smallest number of serious railroad accidents reported for five years. Of these accidents 137 were caused by "defects or failures to a permanent way," 67 by "defects or failures in rolling stock," 97 by negligence, carelessness or malice, and 113 by unforseen obstructions not malicious. There were 268 collisions, 581 derail ments and 42 from other causes. These figures do not include persons casually heating the cell houses. The nurderer was arrested at once, but the paper fails to state whether with or without a warrant, because in France the law is made for the benefit of the people, and not for that of criminals. He was tried, and in spite of the fact that he had a good "war record," was found guilty by a jury. Then his counsel brought up the insanity dodge, but sane enough to order a dinner which he had no means of paying for, and to kill a waiter who tried to arrest him, he was same enough to be hung, and hung he

What Maj. Burke Says.

An Abortionist Caught.

NEW ORLEANS, Jan. 29.—Referring to the question asked Maj. Burke by t W. E. Chandler in a telegram from Washington last night, Maj. Burke disclaims knowledge of any corrupt or disreputable bargains on the part of Mr. Hayes or Southern Congressmen last ! winter, or that Southern men did anything to prejudice Tilden's chances in the Electoral count. He claims that whatever assurances were given or re- t ceived were openly submitted to the Nicholls Legislature, generally dis-cussed and approved, and having been i voted and acted upon by members) the subject could not be regarded as secret. He has contemplated the preparation of the statement of all facts coming under his observation, to be published if any good purpose can be served, but the judge quickly ruled it out, holding thinks the country has heard enough of the doctrine which is discarded in this country, inasmuch as the convict was important subjects to consider. If any publication is made by him, however, he indicates a determination to seek other channels of communication than Mr. Chandler.

Morris, of Philadelphia, late American Minister at Constantinople, says, in an interview, that England opposed the first treaty of commerce between the United States and Turkey, and opposed the concession of trading in the Black Sea. He declares the commerce of the world is indebted to Russia for the opening of the Black Sea, and expresses the opinion that England is more interested in closing the Dardanelles to ships of war than Turkey, the Porte knowing that Constantinople is really safer with the fleets of all the world riding before its walls than it is when they are excluded.

TAR Railroad Gazette reports the number of railroad accidents in this country during 1877 at 891, in which 214 persons were killed and 1,037 were injured. This is the smallest number of serious railroad accidents reported for five years. Of these accidents 137 were caused by "defects or failures in a permanent way;" 67 by edefects or failures in rolling stock;" 97 by negligence, carelessness or malice, and 113 by unforseen obstructions not malicious. There were 268 collisions, 581 derailments and 42 from other causes. In Paris the other day a dead beat tabled a waiter who asked him to pay for the dinner he had ordered and eaten. The murderer was arrested at once, but the paper fails to state whether with or without a warrant, because in France the law is made for the benefit of the people, and not for that of criminals. He was tried, and in spite of the fact that he had a good "war record," was found guilty by a jury. Then his counsel brought up the insanity dodge, but the judge quickly ruled it out, holding the doctrine which is discarded in this country, inasmuch as the convict was sane enough to order a dinner which he had no means of paying for, and to kill a waiter who tried to arrest him, he was same enough to be hing, and hing he will be.

respondent sends the following: There is no longer any doubt that there has been what is called here a little misunderstanding between St. Petersburg and Vienna. Austria, it seems, expected the conditions of peace would be submitted to a European congress, or at least communicated for approval to memhere of the triple alliance. Her suspicions were aroused by Russia's extreme reserve. When this misunderstanding occurred, the Russian ambassador at Vienna, who was on a furlough, was ordered to return to his post, and took explanations and assurances by which it was hoped the late misunderstanding would be completely removed. How far his efforts were successful, has not yet transpired, but there is reason to helieve they had not the instantaneous effect which was auticipated.

been signed or not has become of purely secondary importance. The Porte, at any rate, has approved them, and according to all accounts is quite ready to accept almost anything else which vent Russians from executing the threat of marching on Constantinople. The population of the capital is kept in a constant state of alarm by daily rumors spread by those working in the interests before returning to Asia. It looks very much as if all further steps in negotiations, with the Turks, would in a great measure be made dependent upon the issue of interchange of communication among the powers. What Maj. Burke Says.

An Abortionist Caught.

New Orleans, Jan. 29.—Referring to the question asked Maj. Burke by W. E. Chandler in a telegram from Washington last night, Maj. Burke disclaims knowledge of any corrupt or disreputable bargains on the part of Mr. Haves or Southern Congressmen last | winter, or that Southern men did anything to prejudice Tilden's chances in the Electoral count. He claims that whatever assurances were given or re- ; ceived were openly submitted to the (Nicholls Legislature, generally dis-cussed and approved, and having been i voted and acted upon by members, the subject could not be regarded as secret. He has contemplated the preparation of the statement of all facts coming under his observation, to be published if any good purpose can be served, but thinks the country has heard enough of the whole business, and has other more important subjects to consider. If any publication is made by him, however, he

ROW THE TURKS LIFE.

It is certainly a mystery that the inhabitants of the Ottoman Empire did not all perish years ago from pulmona It diseases Then feet are first swathed in a course rag which is then wound round the lower part of the leg, and bound tightly with twine, on the rag is field a piece of sole leather himmered into a rudely shaped sindal, with sides using one inch up the sides of the foot holes are cut in the upper edies of the sandal and strings tied in them and then taste ied over the top of the foot It is evident that then feet are wer the moment they step into mad or water over m mch in depth. This they are doing community in bid weather consequently their feet are souking wet for a week at a stretch and vet they his and multiply. They violate every known law of hygiene in the ventilation and often the cleanliness of then dwell ings, and vet then children are general ly sturdy looking and the adults show fair average physique. They sleep in tows on a mut laid upon the floor of their underground huta Sometimes the floor is covered with them, and yet they do not appear to suffer for want of oxygen

THE ANTECEDENTS OF DISEASE

Among the antecedents of discuse are mertness in the circulation of The blood, an unnaturally aftenuated condition of the physique indicating that the life current is deficient in nutritive properties, a winbaggard look, mability to digest the food loss of appetite, sleep and strength and a sensation of unnatural languor All these may be regarded is among the indicted approximg disease, which will eventually attack the system and over whelm it, if it is not built up and fortified in advance.
